CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

Annexure A

1. **Software Maintenance-** is a process of modifying a software system or component after delivery to correct faults, improve performance or other attributes, or adapt to a changed environment.

1.1 Types of Maintenance

- **Corrective maintenance** - deals with the repair of faults or defects found in day-today system functions. A defect can result due to errors in software design, logic and coding.
- **Perfective maintenance** - involves making functional enhancements to the system in addition to the activities to increase the system's performance even when the changes have not been suggested by faults. This includes enhancing both the function and efficiency of the code and changing the functionalities of the system as per the users' changing needs.
- **Preventive maintenance** - involves performing activities to prevent the occurrence of errors. It tends to reduce the software complexity thereby improving programme understandability and increasing software maintainability. It comprises documentation updating, code optimisation, and code restructuring

2. System functionalities

The maintenance of the web based online system will require expertise and demonstrated support of a number of functional areas. The systems entail the process of submission of proposals from higher education institutions to be considered for approval and/or accreditation. The systems mentioned above are strongly process driven; database supported and requires a number of common functionalities.

Some of the important system functionalities are:

2.1 Role-Based Users and Authentication

Maintenance must include role-based user registration where certain areas of the application are available to the variously defined roles. Roles are determined by the process flow and procedure of the system

2.2 Work Flow Functionality

Much of the maintenance will consider the user roles in conjunction with the process flow and must then support the management of the various processes via work flow functionality.

2.3 Document Uploading

An important aspect of maintenance will be the workflow functionality of uploading of documentation from the various users.

3. The following numbers of users are currently registered on the system:

3.1 HEQC-online

The online management of programme accreditation

- Seven hundred and eighty (780) Institutional Administrators.
- Seven hundred and ninety nine (799) Evaluators
- One thousand six hundred and eleven (1611) Institutional users
- Twenty-nine (29) internal users

3.2 HEQSF-online

The national database of higher education programmes

- Two hundred and forty five (245) Institutional Administrators.
- Five hundred and ten (510) Institutional users
- Nineteen (19) internal users

3.3 National Reviews-online

The National Reviews are about re-accrediting existing programmes offered at higher education institutions and form part of the CHE's quality assurance system. One of its aims is to increase public confidence in higher education programmes and qualifications.

- Four (4) internal users;
- Twenty-three (23) Institution administrators;
- Ten (10) Reference Group members;
- Ten (10) National Review Committee members, and;
- Forty-five (45) Panel reviewers.

3.4 Contract Register-online

The CHE Contract Register assists users in complying with audit requirements through the management and monitoring of consultant/service provider contracts. Authorised users are required to capture and update the details of contracts with consultants/service providers.

- Only fifteen (15) internal users

**NB: Users have different access rights, depending on the assigned security groups and users*
